

Dear FCC, I am a new subscriber to satellite radio. I would like to state that since I am paying for a service like satellite radio, I think it is up to the owners and operators of this type of service to decide what they will and will not offer their clients. After all we the clients are paying for it. The local news and weather that satellite radio offers is of tremendous help and convenience. Why does the National Association of Broadcasters want to take this away from us? Please, I urge you to reject petition 04-160. It is only a blatant attempt by the NAB to monopolize the market. thankyou.

respectfully, Al Marquez
